Lakewood Registered Nurses Association

BARGAINING UPDATE

May 2 & 3, 2019

Lakewood Contract Bargaining has Begun

Lakewood negotiations opened strong. The LRNA bargaining team met with management representatives from Lakewood Regional Medical Center-Tenet to begin bargaining our next contract. Our current contract has been extended to June 5, 2019.

Our first two days of work were remarkably successful with **Tentative Agreements (TAs) reached on 14 proposals!** This is not typical of bargaining and is a testament to the union team's high level of preparedness. We came to the table ready to go and were able to do that thanks to the high percentage completion rate of the bargaining survey by you, the members. An astonishing 74.9% of Lakewood Registered Nurses Association (LRNA) members completed the bargaining survey and your responses gave us clear insight into what matters most to you.

Management representatives at the table have demonstrated respect for this bargaining process and have worked in earnest to achieve TA's quickly. However we expect more challenging times ahead when we discuss economic issues. With your continued support, we will be successful in completing a next contract that is fair and deserved.

Your bargaining team sends best wishes to all LRNA members for a happy Nurses Week! We appreciate the members who joined us as observers during this first session of bargaining.

Join us and your fellow members on May 29 and 30 as we continue bargaining with management.

See you there!
